These are the best looking panels you can possibly get and Tru Home was so easy to work with. Highly recommend!

I decided to go solar to take advantage of tax credits and the ample sunlight in my area. The first company that came by felt more like a sales pitch than anything else. Their numbers didn't add up and the whole experience left me feeling uneasy.

Luckily I go in touch with TruHome and they sent Carl my way. He has been an amazing and friendly Consultant. Carl is very down to earth and straight forward guy. He shows you the pros and cons without embellishing anything or misleading you in anyway.

Out of the multiple consultations I went through before deciding on a provider, my sit down with Carl has been the most pleasant. You arent sitting with a salesman, you're sitting with a person. Id definitely recommend TruHome, and especially Carl, as a Solar provider.

Outstanding knowledge . Very professional experience. Now going to get panels for the monthly electric bill and after paying off all most free still getting a small bill access to fee did not go with battery for home too pricey as of yet will add when battery comes down in price

I has a spot on my bathroom ceiling from a roof leak. Since this was the first winter with the solar panels, I assumed it was related to their installation. I got a hold of my rep, Mike Frantz. He was super responsive; worked quickly to help me get a Bright Planet tech out asap. He stayed in touch through the whole process. It was comforting to have him walk me through this issue. It WAS NOT the solar panels. The problem was related to a poor roofing installation 12 years prior.

Mike is the best sales person out there! He will assist anyway he can to help get the job designed, installed and inspected. This is all after his part of the process was finished. Highly recommend Mike and TruHome Pros!

We had TruHome Pros help us with our solar project, and it was really a seamless experience. From the first phone call we received to the sales rep come out to our house. The install went very smoothly and quickly as well. It was just under 6 weeks and we had panels on our roof and already started saving money. I would highly recommend doing business with TruHome Pros if you want to deal with professionals that really know what they are doing and truly care about helping their clients.

This process went very smoothly from the beginning: any questions were quickly responded to and taken care of. Panels have been up for a couple weeks now and waiting on electric company to give us the go ahead to flip the switch. There were a couple issues, but after several discussions, everything was taking care of properly and professionally! Thank you!

The project team and crew is excellent. I've been a Union Electrician for 31 years and am rarely impressed but theses guys are pros from start to finish. Espically my sales pm Michael always on top of things to rectify and questions or concerns I have or job concerns that come up. Truly one that goes above and beyond the status quo!! 🙌😊
